author3@email.com

Abstract—Provide a brief summary of your extended abstract here. The Abstract should be about 80–120 words. Avoid using abbreviations and do not cite references in the Abstract. The abstract should clearly state the purpose of the research, methodology, key findings, and conclusions. This summary will be included in the *IEEE Xplore Digital Library* if the paper is accepted and published.

Index Terms—First keyword, second keyword, third keyword, fourth keyword.

INTRODUCTION

These instructions provide a \LaTeX template for preparing extended abstracts for JCSEE Bangkok 2026. Extended abstracts may include figures and tables but must not exceed two (2) pages, including all figures, tables, references, and author information.

This template follows the conference proceedings format, which is consistent with IEEE’s General Proceedings Template. All text must be in a two-column format with fully justified text.

RELATED WORK

I. Literature Review

Include your literature review here. Type your main text in 10-point Times, single-spaced. All paragraphs should be indented approximately 1/6-inch. Be sure your text is fully justified—that is, flush left and flush right.

When citing references, use square brackets. For example, previous research has shown significant results in this area [1]. Multiple citations can be combined [2], [3].

II. Research Gap

Describe the research gap your work addresses. Use proper formatting for any special terms or variables.

METHODOLOGY

Describe your research methodology here. You can include equations as needed. Number equations consecutively with equation numbers in parentheses flush with the right margin:

$$a + b = c \tag{1}$$

Be sure that symbols in your equation have been defined before the equation appears or immediately following. Use “Equation (1)” at the beginning of a sentence, but otherwise use “(1)” to reference equations.

RESULTS AND DISCUSSION

Present your results here. You can include figures and tables as needed.

FIGURE 1: Caption style for describing figures. Provide a short title followed by a detailed explanation of the figure content.

As shown in Figure 1, the results demonstrate... Continue your discussion here.

TABLE 1: Table Type Styles

Table Head	Column Head	Column Head
Table column subhead	Subhead	Subhead
Table copy	More table copy	Data

Table 1 presents the comparative results. Discuss your findings in detail here.

CONCLUSION

Summarize your key findings and their implications. State the main contributions of your work and suggest directions for future research.

ACKNOWLEDGEMENTS

If you wish to identify funding sources or significant contributions by others, include your acknowledgements here. Only include this section in the final camera-ready copy.
